A. FMCG-Agro Products Business:

Global Industry Overview:

'Fast Moving Consumer Goods' forms the fourth largest sector in the Indian economy. The FMCG companies exist in the rural and urban markets and the expected potential of the sector is huge. FMCG companies operate the business through a wide distribution network and the range of fast moving consumer products helps to fetch the revenue fast. The **FMCG Industry** is rapidly expanding around the world. With the increase in population, the demand for consumer goods is rising, thus providing businesses room for growth. Investing in a growing economy like India is a golden chance for organizations to reap the benefits of its expanding FMCG sector. Thus, companies planning to enter this market should consider availing assistance from market experts to plan their foray effectively.

The Fast-Moving Consumer Goods (FMCG) industry has maintained a sustainable pace of growth and returns on investment in the last few years. It is the only sector that has continued to expand even during the pandemic. However, in 2022, there has been a shift in consumer behavior, trends, buying habits, and more, thus affecting this industry. With a probable rise in living costs in the future, there will be both opportunities and risks for organizations conducting business in this sector.

The future needs an agricultural system that produces about 50 percent more food to feed the world's 9 billion people by 2050; that provides food for adequate nutrition; that substantially raises the levels and resilience of incomes and employment for most of the world's poor (75 percent of which live in rural areas and mostly rely on agriculture for their livelihoods); that provides environmental services, such as sequestering carbon, managing watersheds, and preserving biodiversity; and that uses finite land and water resources more efficiently. This system can be achieved with more and better investment in the sector, with more attention to addressing cross-sectoral linkages between agricultural actions and outcomes for economic growth, livelihoods security, the environment, nutrition, and public health.

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

After global and national pandemic-induced lockdowns, there have been a lot of changes that have revolutionized the FMCG industry. The global pandemic has increased the demand for online consumer goods. This has compelled FMCG companies to opt for a direct-to-customer approach and digital channels for offering their goods. Online grocery sales have shown a growth of 17%, indicating that the demand for FMCG goods online will only rise in the coming time.

Moreover, in the last decade, consumer demand has shifted to a more sustainable and environment-friendly front. Thus, major FMCG businesses have been changing their approach in order to provide customers with more ethical and eco-friendly goods.

Also, the pandemic re-introduced the concept of conscious living, with more people making their physical & mental well-being one of their top priorities. Consumers are now looking for foods and beverages that, apart from providing nutritional value, shall boost their health.

For FMCG companies looking to expand their operations, India has been emerging as a hotbed for new opportunities. Market experts have predicted that the FMCG industry in this country is set to grow at a CAGR of 14.9%. This amounts to a market growth of USD 110 billion from 2020 to almost USD 220 billion by 2025. In addition, improved connectivity in urban and rural areas is increasing the demand for FMCG products via e-commerce portals, thus fuelling this rising demand. Furthermore, the e-commerce segment is predicted to be responsible for almost 11% of FMCG sales by 2030. Apart from this, the rise in disposable income among consumers in rural India offers massive potential for organizations to grow.

The Indian Government has made it easier for foreign companies to join the country's FMCG sector by providing approval for 100% foreign equity in the case of single-brand retail. Moreover, for multi-brand retail, the rate is set up to 51%. Businesses will also get production-linked incentive (PLI) schemes that will provide them with an outlay of USD 14.2 billion, thereby boosting their exporting opportunities.

Furthermore, FMCG products are in demand throughout the year. From April 2000 to March 2022, there has been a steady FDI inflow amounting to USD 20.11 billion. It is quite evident that there is no dearth of investments in this sector.

There is also one factor that makes India stand apart in the FMCG market. It has a rising population that, along with increasing brand awareness and consumerist trends, is set to take the FMCG sector to a new high.

The global FMCG market is projected to reach \$15,361.8 billion by 2025, registering a CAGR of 5.4% from 2018 to 2025. Fast moving consumer goods (FMCG) also known as consumer-packaged goods are products that can be bought at a low cost. These products are consumed on a small scale and are generally available in a variety of outlets including grocery store, supermarket, and warehouses. The FMCG market has experienced healthy growth over the last decade because of adoption of experience retailing along with reflecting consumers desire to enhance their physical shopping experience with a social or leisure experience.

The global FMCG market is segmented based on product type, distribution channel, and region. Based on product type it is classified as food and beverages, personal care (skincare, cosmetics, hair care, others), healthcare care (over-the-counter drugs, vitamins & dietary

supplements, oral care, feminine care, others), and home care. The distribution channel segment comprises of supermarkets and hypermarkets, grocery stores, specialty stores, specialty stores, e commerce and others. By region, it is analyzed through North America, Europe, Asia-Pacific, and LAMEA.

Figure: Global FMCG market; Source: Allied Market Research

In 2018, the food & beverage segment held majority share in the FMCG market and is expected to hold a significant share in the global market throughout the forecast period. Consumers today have become more knowledgeable and open to food & beverages consumed by foreign cultures.

This search for novel experience has pushed the food & beverage operators to maintain the quality of their offerings. The trend of healthy eating has also been a top impacting factor affecting the growth of the food & beverage market.

Indian Industry Overview:

The FMCG sector in India expanded due to consumer-driven growth and higher product prices, especially for essential goods. FMCG sector provides employment to around 3 million people accounting for approximately 5% of the total factory employment in India. FMCG sales in the country was expected to grow 7-9% by revenues in 2022-23. The key growth drivers for the sector includes favourable Government initiatives & policies, growing rural market and youth population, new branded products, and growth of e-commerce platforms. Resilience needs to be the key factor in the manufacturing process, daily operations, retail and logistic channels, consumer insights and communication that will help FMCG companies to withstand the test of time and create more value for consumers in the long run.

Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle-class population which is larger than the total population of USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access and changing lifestyles have been the key growth drivers for the sector. The urban segment (accounts for a revenue share of around 55%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

According to market experts, between 2022 to 2026, the FMCG industry is all set to grow by USD 310.5 billion. It has also been predicted that consumer spending will rise to approximately USD 8.85 trillion by 2025. As a result of increasing consumer awareness and growth of organized retailing activities, companies can reap the benefits of this growth phase in the years to come.

Apart from these aspects, businesses can expect an increase in consumer goods because of global population growth. The rise in individual income, easy access to goods via e-commerce platforms, launching of new products, and effective advertising are all responsible for the exponential growth of this industrial sector.

In India, retail sales are slowly transcending to digital mediums. A lot of small brands are gaining customers via social media or e-commerce platforms. Their promise to provide hand-made, all-natural, chemical-free products will enable them to gain a substantial share of the FMCG market.

Furthermore, according to a market survey, up to 57% of consumers are purchasing products of a particular brand based upon recommendations on whom they can trust. Thus, social media influencers can help organizations build a community of loyal customers who can help drive up their sales.

Key Market Movements:

- According to a joint report released by industry body FICCI and property consultancy firm Anarock, Indian e-commerce market is expected to reach US\$ 120 billion by 2026 from US\$ 38 billion in 2021
- The Government has allowed 100% Foreign Direct Investment (FDI) in food processing and single-brand retail and 51% in multi-brand retail. This would bolster employment, supply chain and high visibility for FMCG brands across organised retail markets thereby bolstering consumer spending and encouraging more product launches.
- Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India.
- India has a large base of young consumers who form majority of the workforce, and due to time constraints, barely get time for cooking.
- The number of internet users in India is likely to reach 1 billion by 2025. It is estimated that 40% of all FMCG consumption in India will be made online by 2020. The online FMCG market is forecast to reach US\$ 45 billion in 2020 from US\$ 20 billion in 2017.

Figure: Trends in FMCG revenues over the years; Source www.ibef.org

- The minimum capitalisation for foreign FMCG companies to invest in India is US\$ 100 million.
- FMCG market is expected reach US\$ 220 billion by 2025.

Key Initiatives:

In 2022, Government announced that food processing industry has invested Rs. 4,900 crore (US\$ 593 million) so far under the PLI scheme which was approved in March 2021, with a budget outlay of Rs. 10,900 crore (US\$ 1.3 billion), likely to increase sales and exports of food products.

A total of 182 applications have been approved under the PLI scheme for the food processing industry. This includes 30 applications for millets-based products under the PLI scheme (8 large entities and 22 SMEs)

In 2022, a total of 112 food processing projects were completed and operationalized, leveraging private investment of Rs. 706.04 crore (US\$ 85.4 million) and generating direct and indirect employment for 25,293 people.

In order to boost the food processing sector, the Centre has permitted under the Income Tax Act a deduction of 100% of profit for five years and 25% of profit in the next five years in case of new agro processing industries set up to package and preserve fruits and vegetables.

Excise Duty of 16% on dairy machinery has been fully waived off and excise duty on meat, poultry and fish products has been reduced from 16% to 8%.

An amount of Rs. 1,000 crore (US\$ 120.7 million) is being set up initially in NITI Aayog for SETU for setting up of incubation centres and enhance skill development to facilitate the startup ecosystem in the country while improving the ease of doing business.

The governments' incentives and the FDI funds have helped the FMCG sector strengthen employment, establish a more robust supply chain, and capture high visibility for FMCG brands across established retail markets.

Union Budget 2023-24 has allocated US\$ 976 million for PLI schemes that aims to reduce import costs, improve the cost competitiveness of domestically produced goods, increase domestic capacity, and promote exports.

As per the Union Budget 2022-23:

Rs. 1,725 crore (US\$ 222.19 million) has been allocated to the Department of Consumer Affairs

Rs. 215,960 crore (US\$ 27.82 billion) has been allocated to the Department of Food and Public Distribution.

The government's production-linked incentive (PLI) scheme gives companies a major opportunity to boost exports with an outlay of US\$ 1.42 billion.

B. Textile Business:

Global Industry Overview:

The Textile Industry is expected to grow from USD 723 billion in 2023 to USD 859 billion by 2028, at a CAGR of 3.52% during the forecast period (2023-2028).

The COVID-19 pandemic has challenged the textile industry drastically in 2020. Asia, which is one of the largest markets for the textile industry in the world, has suffered from the prolonged lockdowns and restrictions in the majority of Asian countries along with the sudden drop in international demand for their products. The loss was particularly high in countries where the textile industry accounted for a larger share of the exports. According to the study by the International Labour Organization (ILO) the global textile trade collapsed during the first half of 2020. Also, exports to the major buying regions in the European Union, the United States, and Japan fell by around 70%. The industry also suffered several supply chain disruptions due to the shortages of cotton and other raw materials.

The textile industry is an ever-growing market, with key competitors being China, the European Union, the United States, and India. China is the world's leading producer and exporter of both raw textiles and garments. The United States is the leading producer and exporter of raw cotton, while also being the top importer of raw textiles and garments. The textile industry of the European Union comprises Germany, Spain, France, Italy, and Portugal at the forefront with a value of more than 1/5th of the global textile industry. India is the third-largest textile manufacturing industry and is responsible for more than 6% of the total textile production, globally. The rapid industrialization in the developed and developing countries and the evolving technology are helping the textile industry to have modern installations which are capable of high-efficient fabric production. These factors are helping the textile industry to record more revenues during the study period and are expected to help the industry further in the forecast period.

The global textile industry impacts nearly every human being on the planet. The global textile industry is a manufacturing sector that's currently worth nearly three trillion dollars (in U.S. dollars) and includes the production, refinement, and sale of both synthetic and natural fibers used in thousands of industries.

It's estimated anywhere between 20 million and 60 million people are employed in the textile industry worldwide. Employment in the garment industry is particularly important in developing economies such as India, Pakistan, and Vietnam. The industry accounts for approximately two percent of global gross domestic product (GDP) and accounts for an even greater portion of GDP for the world's leading producers and exporters of textiles and garments.

The fashion application segment led the market and accounted for more than 73% of the global revenue share in 2021 owing to the increased consumer spending on clothing and apparel. In addition, high consumer demand for crease-free suiting & shirting fabrics, as well as quality-dyed & printed fabrics across the globe will drive the segment growth further.

Figure: Global market size by application; source: <https://www.databridgemarketresearch.com/reports/global-textile-market>

Moreover, the growing population and rapid urbanization in the emerging economies, such as India, Bangladesh, Vietnam, and Brazil, are likely to boost the demand for clothing and apparel, thereby positively contributing to the segment growth.

In addition, increasing application in the construction, transportation, medical, and protective clothing applications have boosted the use of the same, which is consequently driving the textiles market. The use of textiles in different areas of a household is one of the prominent growth driving factors for the household application segment.

The textile industry works on three major principles, designing, production, and distribution of different flexible materials, such as yarn and clothing. Several processes, such as knitting, crocheting, weaving, and others, are largely used to manufacture a wide range of finished and semi-finished goods in bedding, clothing, apparel, medical, and other accessories.

Increasing demand for online shopping is expected to drive the textile manufacturing market. Manufacturers can now sell their products on a larger platform than before, which will increase their customer base geographically driving the growth of the textile manufacturing market. In countries such as India, for instance, e-commerce portals have boosted the sales of traditional garments by giving larger exposure to producers who were confined to one geography.

Indian Industry Overview:

- India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.
- India is the third-largest textile manufacturing industry and is responsible for more than 6% of the total textile production, globally. The rapid industrialization in the developed and developing countries and the evolving technology are helping the textile industry to have modern installations which are capable of high-efficient fabric production.
- The Indian textiles market is expected to be worth more than US\$ 209 billion by 2029.
- In November 2022, local weavers in Tuensang in Nagaland were provided 45 days of skill-upgrading training, which would equal 315 hours under the SAMARTH programme.
- In 2022-23, the Sardar Vallabhbhai Patel International School of Textiles and Management (SVPISTM) is planning to offer B.Sc. and MBA courses in technical textiles.
- In November 2021, Federico Salas, the Mexican Ambassador to India, visited the Khadi India Pavilion at the India International Trade Fair 2021 and suggested that India and Mexico should come together to promote Khadi globally.
- For instance, in India, 100 percent Foreign Direct Investments (FDI) is allowed in textiles, which is set to focus on positive market growth.
- In addition, the consumption of textile fibers, such as synthetic and cellulose fibers, needed for filtration in industrial applications is expected to have a positive impact on the regional market growth.
- The Indian Government has announced the setting up of seven mega textile parks in the next three years. The government has also decided to rationalize the duties on raw material inputs to manmade textiles by reducing the customs duty rate on caprolactam, nylon chips, and nylon fiber and yarn to 5 %.
- Paraguay's Ministry of Industry and Commerce announced that it will be investing USD 1.1 million in the manufacturing sector, mainly benefiting the clothing, textiles, and footwear industries, among other areas related to assembly operations.

Key Market Movements:

- The market has been witnessing rapid growth due to growing expansion and mergers & acquisitions activities.
- The companies are trying to increase their sales through various government trade agreements along with partnerships with e-commerce portals, such as Amazon, Flipkart, e-Bay, and others.
- The market is fragmented due to the presence of several small- and medium-scale manufacturers, especially in countries, such as China and India.
- Moreover, the easy availability of low-cost labor coupled with the government support to establish various big players' business units in the aforementioned countries is expected to add positive growth to the market.
- Increasing Demand for Natural Fibers: These fibers are widely used to manufacture garments, apparel, construction materials, medical dressings, and interiors of automobiles, among others. The abundance of natural fibers, especially cotton, in China, India, and the United States, is contributing significantly to the growth of the global textile market. The increasing consumption of natural fibers, such as cotton, silk, wool, and jute, will drive the global textile market during the forecast period.

- Shifting Focus Toward Non-woven Fabrics: The increasing birth rate and aging population has contributed to the growing demand for hygiene products, such as baby diapers, sanitary napkins, and adult incontinence products, which, in turn, is expected to fuel the demand for non-woven fabrics.
- The automobile industry manufactures a large number of exterior and interior parts using non-woven fabrics owing to their durability. Rapid industrialization and recent innovations in the field of textile technology are other factors fueling demand for non-woven fabrics, globally.

Figure: Non-woven Fabric export share by the regions; Source: www.mordorintelligence.com

- The future of the Indian textiles industry looks promising, buoyed by strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players.
- Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route. The Rs. 10,683 crore (US\$ 1.44 billion) PLI scheme is expected to be a major booster for the textile manufacturers. The scheme proposes to incentivize man-made fiber apparel.

C. **INFRA PRODUCT BUSINESS:**

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US\$ 26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The "Smart Cities Mission" and "Housing for All" programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure and construction development projects.

In order to meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Global Industry Review:

- The Global Infrastructure Market was valued at USD 2,242.3 Billion in 2021 and is expected to reach USD 3,267.3 Billion by 2027, registering a growth rate of 6.48% during the forecast period.

- The global steel rebar market size was valued at USD 219.2 billion in 2019 and is expected to grow at a CAGR of 7.2% from 2020 to 2025. The expansion of construction sector is anticipated to remain a key driver for market growth. Growing construction output, especially in emerging countries, such as China, Brazil, and India, and diversification program in the Middle East countries, are contributing to the demand for steel rebar.

Figure: Global Steel bar market by application; Source: www.grandviewresearch.com

- Major GDP contribution in the Middle Eastern countries comes from the oil & gas sector. However, countries in the region are focusing on the development of non-oil & gas sectors such as residential construction and infrastructure. For instance, the Saudi Arabian government, under its Saudi Arabia Vision Plan 2030, revealed an infrastructure investment plan worth USD 450 billion to reduce its dependency on the oil & gas sector for a more effective government, to diversify its economy, and build a robust society.
- For food grade piping system the global HDPE pipes market was valued at \$17,907 million in 2017 and is projected to reach \$26,518 million by 2025, growing at a CAGR of 5% from 2018 to 2025.

Indian Industry Overview:

- India currently has the fifth-largest metro network in the world and will soon overtake advanced economies such as Japan and South Korea to become the third-largest network. Metro rail network reached 810 kms and is operational in 20 cities as of September 2022.
- At almost 20 kms, Mumbai monorail is the third largest route in the world after China with 98 kms and Japan with 28 kms.
- India plans to spend US\$ 1.4 trillion on infrastructure through 'National Infrastructure Pipeline' in the next five years. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion. India will need to construct 43,000 houses every day until 2022 to achieve the vision of Housing for All by 2022. As of 22 August, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh houses have been grounded, and 62.21 lakh houses have been completed, under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban).
- Hundreds of new cities need to be developed over the next decade. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Final-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country's increasing e-commerce supply chains. India is expected to become the third-largest construction market globally by 2022. Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over FY21-26 driven by spending on water supply, transport and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the 10th five year plan as against 9% in the 11th five year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five year plan, with 40% of the funds coming from the private sector.
- Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

- For Infrastructure business steel fittings and steel bars are very important tools for the growth in this segment.
- In FY22 (till January), the production of crude steel and finished steel stood a 98.39 MT and 92.82 MT, respectively. According to CARE Ratings, crude steel production is expected to reach 112-114 MT (million tonnes), an increase of 8-9% YoY in FY22.
- As of September 2021, India was the world's second-largest producer of crude steel, with an output of 9.5 MT.

KeyMarketMovements:

- Capital investment outlay for infrastructure is being increased by 33% to Rs.10 lakh crore (US\$ 122 billion), which would be 3.3% of GDP and almost three times the outlay in 2019-20.
- Infrastructure Finance Secretariat is being established to enhance opportunities for private investment in infrastructure that will assist all stakeholders for more private investment in infrastructure, including railways, roads, urban infrastructure, and power.
- The Government has decided to continue the 50-year interest free loan to state governments for one more year to spur investment in infrastructure and to incentivize them for complementary policy actions, with a significantly enhanced outlay of Rs 1.3 lakh crore (US\$ 16 billion).
- A capital outlay of Rs 2.40 lakh crore (US\$ 29 billion) has been provided for the Railways, which is the highest ever outlay and about 9 times the outlay made in 2013- 14.
- 100 critical transport infrastructure projects, for last and first mile connectivity for ports, coal, steel, fertilizer, and food grains sectors have been identified and will be taken up on priority with investment of Rs. 75,000 crore (US\$ 9 billion), including Rs. 15,000 crore (US\$ 1.8 billion) from private sources.
- 50 additional airports, heliports, water aerodromes and advance landing grounds will be revived for improving regional air connectivity.
- An Urban Infrastructure Development Fund (UIDF) will be established through use of priority sector lending shortfall, which will be managed by the National Housing Bank, and will be used by public agencies to create urban infrastructure in Tier 2 and Tier 3 cities.
- States will be encouraged to leverage resources from the grants of the 15th Finance Commission, as well as existing schemes, to adopt appropriate user charges while accessing the UIDF.
- For realizing the vision of "Make A-I in India and Make A-I work for India", three centers of excellence for Artificial Intelligence will be set-up in top educational institutions.
- The Digital Public infrastructure for agriculture will be built as an open source, open standard and inter operable public good that will enable inclusive, farmer-centric solutions through relevant information services for crop planning and health, improved access to farm inputs, credit, and insurance, help for crop estimation, market intelligence, and support for growth of agri-tech industry and start-ups.
- In Budget 2023-24, capital investment outlay for infrastructure is being increased by 33% to Rs.10 lakh crore (US\$ 122 billion), which would be 3.3% of GDP.
- Started with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 in the roads and bridges sub-sector.
- The Indian Railways expects to complete total revenue of Rs. 2,35,000 crore (US\$ 28.3 billion) by the end of fiscal year 2022-23. The overall revenue of Indian Railways at the end of August'22 was Rs. 95,486.58 crore (US\$ 11.5 billion), showing an increase of Rs. 26,271.29 crore (US\$ 3.1 billion) (38%) over the corresponding period of last year.
- The Infrastructure in India is estimated to grow at a CAGR of approximately 7% during the forecast period.
- India's logistics market is estimated to reach US\$ 410.75 billion in 2022 and is expected to reach US\$ 556.97 billion by 2027, growing at a CAGR of 6.28%. India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years.
- In December 2022, AAI and other Airport Developers have targeted capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities.
- During the fiscals 2020 to 2025, sectors such as Energy (24%), Roads (19%), Urban (16%), and Railways (13%) amount to around 70% of the projected capital expenditure in infrastructure in India.

D. **ENERGY BUSINESS:(Materials, Products and Services for the Renewable Energy Equipment and Projects)**

Global IndustryReview:

- The global renewable energy market was valued at \$881.7billion in 2020, and is projected to reach \$1,977.6 billion by 2030, growing at a CAGR of 8.4% from 2021 to 2030. Renewable energy, even referred as clean energy, is usually derived from natural sources that are constantly replenished.
- Renewable energy collectively provides around 7% of the world's energy demand. Renewable energy is relatively more expensive than fossil fuel. Several factors are responsible to drive the usage of renewable energies, the most crucial being the attribution of global warming due to carbon dioxide (CO2) emission from the combustion of fossil fuels.

- The renewable energy market analysis is done on the basis of type, end-use, and region. On the basis of type, the market is categorized into hydroelectric power, wind power, bioenergy, solar energy, and geothermal energy. The end-user covered in the study includes residential, commercial, industrial, and others. Region wise, the market is studied across North America, Europe, Asia-Pacific, and LAMEA.
- The residential and industrial sectors are expected to consume more energy during the forecast period in Asia-Pacific. Furthermore, India has significant growth potential; however, due to its inconsistent policy and business environment in past, the renewable energy share in total energy production was less. There has been an increase in investments in renewable energy projects in India, owing to which it is one of the countries experiencing rapid growth in the Asia-Pacific market.

By end use, the residential segment acquired the top position of the global market in 2020, and it is anticipated to grow at a CAGR of 8.4% during the forecast period. Increase in use of geothermal heat pump in residential heating application is expected to drive the growth of the market.

The requirement of geothermal power is expected to increase significantly with rise in demand for electricity. This factor is expected to drive the growth of the market. Several companies in the market offer geothermal power to the residential sectors.

INDEPENDENT AUDITOR'S REPORT

To the Members of **INTEGRA ESSENTIA LIMITED**

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the Standalone financial statements of **INTEGRA ESSENTIA LIMITED** ("the Company"), which comprise the balance sheet as at 31st March, 2023, the statement of Profit and Loss (Including Other Comprehensive Income), statement of changes in equity, and the statement of cash flows for the period then ended, and notes to the Standalone Financial Statements, including a summary of significant accounting policies and other explanatory information

Subject to the possible impact due to matters reported in other matters para, in our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2023, its profit and total comprehensive Profit, changes in equity and its cash flows for the period ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Standalone Financial Statements* section of our report. We are independent of the Company in accordance with the *Code of Ethics* issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Standalone Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. Except for the documents/information related to matters mentioned in other matters para, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Business Responsibility Report but does not include the Standalone Financial Statements and our auditor's report thereon.

Our opinion on the Standalone Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Financial Statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

OTHER MATTERS

We draw attention to following points:

- i. Confirmation of balances of Sundry Debtors, Sundry Creditors including advances made to suppliers and advances received from customers have been provided by management of the company and relied upon by us. The balance confirmations are yet to be received from parties in response to our request.

Our conclusion is not modified in respect of above matters.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, we give in the Annexure-"A" a statement on the matters specified in paragraphs 3 and 4 of the Order.

Annexure "B" to the Independent Auditors Report on the Standalone Financial Statements of INTEGRA ESSENTIA LIMITED

(Referred to in paragraph 2 (f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)

REPORT ON THE INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING UNDER CLAUSE (i) OF SUB-SECTION 3 OF SECTION 143 OF THE COMPANIES ACT, 2013 ("THE ACT")

We have audited the internal financial controls over financial reporting of INTEGRA ESSENTIA LIMITED ("the Company") as of March 31, 2023 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my/our audit conducted in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate Internal Financial Controls over Financial Reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Financial Statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

These financial statements comply, in all material respects, with Ind AS notified under section 133 of the Companies Act, 2013 ("the Act"), Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other relevant provisions of the Act.

(ii) Historical Cost Convention

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities:

- a) Certain financial assets and liabilities that are measured at fair value
- b) Derivative financial instruments

(iii) Functional and Presentation Currency

These financial statements are presented in Indian Rupees, which is also the functional currency of the Company.

(iv) Current and Non-current Classification

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle (Twelve months) and other criteria set out in Schedule III to the Act.

(b) Property, Plant and Equipment (PPE) and Depreciation

All items of PPE are stated at cost less depreciation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition and initial estimate of costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are included in the carrying amount of PPE or recognised as a separate PPE, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Machinery spares and servicing equipment are recognised as PPE when they meet the definition of PPE. Otherwise, such items are classified as inventory. Capital work-in-progress includes cost of PPE under installation / under development as at the Balance Sheet date.

The Company depreciates its PPE over the useful life in the manner prescribed under Part C of Schedule II to the Act. Depreciation commences when the assets are ready for their intended use and is computed on pro-rata basis from the date of installation/acquisition till the date of sale/disposal. Management believes that useful life of assets are same as those prescribed in Schedule II to the Act, except for machinery spares wherein based on technical evaluation, useful life has been estimated to be different from that prescribed in Schedule II of the Act

Assets	Useful Life
Plant & Machinery	5
Furniture and Fixtures	10 years
Office Equipments	3 years
Computer	3 years

Lease hold PPE are amortised over the period of lease or useful life, whichever is lower. Leasehold land (under Finance Lease) is amortised over the period of lease. Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount.

These are included in the Statement of Profit and Loss.

(c) Intangible Assets and Amortisation

Intangible assets that are acquired by the Company, which have finite useful lives are measured at cost less amortisation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition.

Intangible assets are amortised on straight line basis over the estimated useful life.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount. These are included in the Statement of Profit and Loss.

(d) **Leases**

At inception of a contract, company shall assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Where the Company is Lessee

At the Inception, lessee shall recognise and measure Right-of-use asset and lease liability at cost. Right to use assets shall comprise initial measurement of lease liability, any lease payments made at or before the commencement date, less any lease incentives received, any initial direct costs incurred by the lessee; and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Lease liability is the present value of the lease payments that are not paid. These lease payments shall be discounted using the interest rate implicit in the lease (if readily determined) otherwise should be discounted at lessee's incremental borrowing rate.

If the lease contract transfers ownership of the underlying asset, at the end of the lease term or if, the cost of the right-of-use asset reflects that the lessee will exercise a purchase option, then depreciate the right-of-use asset over the useful life of the underlying asset. Otherwise, depreciate the right-of-use asset till the end of the useful life of the right-of-use asset or the end of the lease term, whichever is earlier.

The lease term as the non-cancellable period of a lease, together with both: (a) periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and (b) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option.

Subsequently, lessee shall measure the right-of-use asset applying a cost model.

Where the Company is Lessor

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight line basis over the term of the relevant lease

(e) **Borrowing Cost**

Borrowing costs are interest and other costs that the Company incurs in connection with the borrowing of funds and is measured with reference to the effective interest rate applicable to the respective borrowing.

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use. Other borrowing costs are expensed in the period in which they are incurred.

(f) **Financial instruments**

(i) Financial Assets

Initial Recognition and Measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent Measurement

The Company classifies financial assets as subsequently measured at amortised cost, fair value through other comprehensive income (FVTOCI) or fair value through profit or loss (FVTPL) on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset, as per Ind AS 109.

a. Subsequent Measurement - Equity Instruments

All equity investments other than investments in subsidiaries, joint ventures and associates are measured at fair value. Equity investments which are held for trading are classified as FVTPL. For all other equity investments, the Company decides to classify the same either at FVTOCI or FVTPL. The Company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

Investment in equity instruments of subsidiaries, joint ventures and associates are measured at cost.

b. Subsequent Measurement - Debt Instruments

A financial asset being debt instrument that meets the following 2 conditions is measured at amortised cost (net off any write down for impairment) unless the asset is designated at fair value through profit or loss under the fair value option.

Business Model Test: the objective of the Company's model is to hold the financial asset to collect the contractual cash flows (rather than to sell the instrument prior to its contractual maturity to realise its fair value changes).

Cash Flow Characteristics Test: The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

A financial asset that meets the following 2 conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option.

Business Model Test: the financial asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling the financial assets.

Cash Flow Characteristics Test: The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

Even if an instrument meets the two requirements to be measured at amortised cost or fair value through other comprehensive income, a financial asset is measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an 'accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognising the gains or losses on them on different basis.

All other debt instruments are measured at fair value through profit or loss. **Derecognition of Financial Assets**

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset, to another entity.

Impairment of Financial Assets

Loss allowance for expected credit losses is recognised for financial assets measured at amortised cost and FVTOCI.

For financial assets other than trade receivables, whose credit risk has not significantly increased since initial recognition, loss allowance equal to twelve months expected credit losses is recognised. Loss allowance equal to the lifetime expected credit losses is recognised if the credit risk on the financial instruments has significantly increased since initial recognition.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables, considering historical trend, industry practices and the business environment in which the Company operates or any other appropriate basis.

The impairment losses and reversals are recognised in Statement of Profit and Loss.

(ii) *Equity and Financial Liabilities*

Debt and equity instruments issued by an entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

a. **Equity Instruments**

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

b. **Financial Liabilities**

Initial Recognition and Measurement

Financial liabilities are initially recognised at fair value plus any transaction costs that are attributable to the acquisition of the financial liabilities, except for the financial liabilities at FVTPL which are initially measured at fair value.

Subsequent Measurement

The financial liabilities are classified for subsequent measurement either at amortised cost or at fair value through Profit and Loss (FVTPL).

Amortised cost for financial liabilities represents amount at which financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount.

Derecognition of Financial Liabilities

A financial liability is removed from the Balance Sheet when the obligation is discharged, or is cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(g) **Fair Value Measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted prices in active markets for identical assets or liabilities
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 – Inputs for the asset or liability that are not based on observable market data.

(h) **Inventories**

Inventories are stated at the lower of cost and net realisable value. Costs comprise direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. The cost formula used for determination of cost is 'Weighted Average Cost'.

Machinery spares, stand-by equipment and servicing equipment are recognised as inventory when the useful life is less than one year and the same are charged to the Statement of Profit and Loss as and when issued for consumption.

(i) **Income Tax**

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The Company's liability for current tax is calculated using the Indian tax rates and laws that have been enacted by the reporting date. The Company periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretations and provisions where appropriate.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax assets is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and current tax liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternate Tax (MAT) credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

(j) **Provisions and Contingencies Provisions**

A provision is recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent Liabilities and Contingent Assets

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases, where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements unless the probability of outflow of resources is remote.

Contingent assets are not recognised in the financial statements. If the inflow of economic benefits is probable, then it is disclosed in the financial statements. Provisions, contingent liabilities, contingent assets and commitments are reviewed at each Balance Sheet date.

(k) **Employee Benefits**

- (i) *Short-term Obligations*

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) *Post-employment Obligations*

The Company operates the following post-employment schemes:

- (a) Defined benefit plan (Gratuity), and
- (b) Defined contribution plans such as, provident fund. Defined Benefit Plan

The liability or asset recognised in the Balance Sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually on the basis of actuarial valuation using the Projected Unit Credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The interest cost is calculated by applying the discount rate to the balance of the defined benefit obligation. This cost is included in employee benefits expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income.

Defined Contribution Plans

Defined Contribution Plans such as provident fund are charged to the Statement of Profit and Loss as an expense, when an employee renders the related services.

(iii) *Other Long-term Employee Benefits*

The liabilities for compensated absences that are not expected to be settled wholly within 12 months are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the Projected Unit Credit method. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in the Statement of Profit and Loss.

The obligations are presented as current liabilities in the Balance Sheet if the entity does not have any unconditional right to defer settlement for at least 12 months after the end of the reporting period, regardless of when the actual settlement is expected to occur.

(l) **Cash and Cash Equivalents**

For the purpose of presentation in the Statement of Cash Flows as well as the Balance Sheet, cash and cash equivalents include cash on hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(m) **Earnings per Share (EPS)**

Basic earnings per share are computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for the events for bonus issue, bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares).

Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income (net off any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares.

(n) **Dividend Distribution to Equity Shareholders**

Dividend distributed to Equity shareholders is recognised as distribution to owners of capital in the Statement of Changes in Equity, in the period in which it is paid. Dividend proposed by the Board of Directors, subject to the approval of shareholders, is disclosed in the notes to financial statements.

(o) **Foreign Currency Transactions**

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

(p) **Revenue Recognition**

Effective from 01 April 2018, the Company has adopted Indian Accounting Standard 115 (Ind AS 115-

'Revenue from contracts with customers'. Revenue from contracts with customers is recognized on transfer of control of promised goods

or services to the customer at amount that reflects the consideration to which the company is expected to be entitled to in exchange for those goods or services. Revenue towards satisfaction of performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract. This variable consideration is estimated based on expected value of outflow. Revenue (net of variable consideration) is recognized only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Revenue from sale of products is recognized when the control on the goods have been transferred to the customer. The performance obligation in case of sale of products is satisfied at a point in time when material is shipped / delivered to the customer as may be specified in the contract.

Interest Income

Interest income is accrued on a time proportion basis, by reference to the principal outstanding and the applicable effective interest rate.

Dividend Income

Dividend income from investments is recognised when the shareholder's rights to receive payment have been established.

Income from Services

Income from services is recognised (net of taxes as applicable) as they are rendered, based on agreement/ arrangement with the concerned customers.

(q) **Significant Accounting Estimates, Judgements and Assumptions:**

The preparation of the Company's financial statements in conformity with Ind AS requires Management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances existing when the financial statements were prepared. The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognised in the year in which the estimates are revised and in any future year affected.

In the process of applying the Company's accounting policies, Management has made the following judgements which have significant effect on the amounts recognised in the financial statements:

- i. **Useful Lives of Property, Plant and Equipment:** Determination of the estimated useful life of tangible assets and the assessment as to which components of the cost may be capitalised. Useful life of tangible assets is based on the life specified in Schedule II of the Act and also as per Management estimate for certain category of assets. Assumption also needs to be made, when the Company assesses, whether as asset may be capitalised and which components of the cost of the assets may be capitalised.
- ii. **Fair Value Measurement of Financial Instruments:** When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs for these valuations are taken from observable sources where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of various inputs including liquidity risk, credit risk, volatility etc. Changes in assumptions/ judgements about these factors could affect the reported fair value of financial instruments
- iii. **Measurement of Defined Benefit Plan:** The cost of the defined benefit gratuity plan and other post-employment benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
- iv. **Impairment of Financial Assets:** Trade receivables are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when Management deems them not collectable. Impairment is made on the expected credit loss model, which is the present value of the cash shortfall over the expected life of the financial assets. The impairment provisions for financial assets are based on assumption about the risk of default and expected loss rates. Judgement in making these assumptions and selecting the inputs to the impairment calculation are based on past history, existing market condition as well as forward looking estimates at the end of each reporting period.
- v. **Impairment of Non-financial Assets:** The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered as impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

- vi. **Contingencies:** Management judgement is required for estimating the possible outflow of resources, if any, in respect of contingencies/ claim/ litigation against the Company as it is not possible to predict the outcome of pending matters with accuracy.

B. Fair value measurements recognised in the statement of financial position:

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Subtotal	-	-	5,423.87	-	-	4,480.72

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values: Cash and cash equivalents, Trade receivables, Other current Financial assets, Trade payable and other current Financial liabilities approximate their carrying amounts largely due to the short-term maturities or nature of these instruments.

C. Fair values hierarchy

All assets and liabilities for which fair value is measured or disclosed in the Standalone Financial Statements are categorised within the fair value hierarchy, described as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

There have been no transfers between levels during the period.

Valuation process and technique used to determine fair value

- The management assessed that fair value of cash and cash equivalents, trade receivables, trade payables, bank overdrafts and other current financial assets and liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.
- The fair values of the equity investment which are quoted, are derived from quoted market prices in active markets. The Investments measured at fair value and falling under fair value hierarchy Level 3 are valued on the basis of valuation reports provided by external valuers with the exception of certain investments, where cost has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represents the best estimate of fair values within that range.
- The fair value of non-current borrowings carrying floating-rate of interest is not impacted due to interest rate changes, and will not be significantly different from their carrying amounts as there is no significant change in the under-lying credit risk of the Company (since the date of inception of the loans).

D. Credit risk

The maximum exposure to credit risks is represented by the total carrying amount of these financial assets in the balance sheet

Particulars	As at 31 March 2023	As at 31 March 2022
Trade receivables	0.00	789.70
Cash and cash equivalents	556.42	44.07
Investments	1,991.68	0.00
Loans	8,264.29	0.35
Other financial assets (including investments)	137.85	0.60

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

Credit risk on cash and cash equivalents and bank deposits is generally limited as the Company transacts with Banks having a high credit ratings assigned by domestic credit rating agencies.

INDEPENDENT AUDITOR'S REPORT

To the Members of **INTEGRA ESSENTIA LIMITED**

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying Consolidated financial statements of **INTEGRA ESSENTIA LIMITED** (hereinafter referred to as "Holding Company"), its Subsidiary/associates/ joint ventures (the Parent and its Subsidiary/associates/ joint ventures together referred to as 'the Group'), which comprise the consolidated balance sheet as at 31st March, 2023, the consolidated statement of Profit and Loss (Including Other Comprehensive Income), consolidated statement of changes in equity, and the consolidated statement of cash flows for the period then ended, and notes to the Consolidated Financial Statements, including a summary of significant accounting policies and other explanatory information.

Subject to the possible impact due to matters reported in other matters para, in our opinion and to the best of our information and according to the explanations given to us, the aforesaid Consolidated financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2023, its profit and total comprehensive Profit, changes in equity and its cash flows for the period ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the *Code of Ethics* issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Consolidated Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. Except for the documents/information related to matters mentioned in other matters para, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial statements and auditors' report thereon

The Holding Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Business Responsibility Report but does not include the Consolidated Financial Statements and our auditor's report thereon.

Our opinion on the Consolidated Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Consolidated Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Consolidated financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Indian accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Consolidated Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Consolidated Financial Statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the group and its associates are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated Financial Statements, including the disclosures, and whether the Consolidated Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the audit of the financial Statements of such entity included in the Consolidated Financial Statements of which we are the independent auditors, for the other entities included in the Consolidated Financial Statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the Consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Ind AS financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Consolidated Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

OTHER MATTERS

The accompanying consolidated Statement includes the unaudited standalone financial information, in respect of M/s R. K. Industries (Partnership Firm), whose unaudited financial information reflects Parent company's share of profit after tax of Rs. 6.20 Lakhs for the year ended 31st March 2023 and total comprehensive income of Rs. NIL for the year ended 31st March 2023, as considered in the consolidated audited financial results. These unaudited financial information have been reviewed by their auditor and have been approved and furnished to us by the management and our conclusion on the Statement, in so far as it relates to the amounts and disclosures included in respect of these Subsidiaries/ associates/ joint ventures, is based solely on such unaudited financial information.

Annexure "A" to the Independent Auditors Report on the Consolidated Financial Statements of INTEGRA ESSENTIA LIMITED

(Referred to in paragraph 2 (f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)

REPORT ON THE INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO CONSOLIDATED FINANCIAL STATEMENTS UNDER CLAUSE (i) OF SUB-SECTION 3 OF SECTION 143 OF THE COMPANIES ACT, 2013 ("THE ACT")

We have audited the internal financial controls with reference to consolidated financial statements of INTEGRA ESSENTIA LIMITED ("hereinafter referred to as Holding Company") as of March 31, 2023 in conjunction with our audit of the Consolidated Financial Statements of the Holding Company and such companies incorporated in India under the companies Act, 2013 which are its associates company, as at and for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The respective Company's management is responsible for establishing and maintaining internal financial controls based on the criteria established by the respective Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the internal financial controls with reference to consolidated financial statements based on my/our audit conducted in accordance with the Guidance Note and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Consolidated Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

MEANING OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO CONSOLIDATED FINANCIAL STATEMENTS

A company's internal financial controls with reference to consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Consolidated Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Consolidated Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Consolidated Financial Statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO CONSOLIDATED FINANCIAL STATEMENTS

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial controls with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls with reference to consolidated financial statements and such internal financial controls with reference to consolidated financial statements were operating effectively as at March 31, 2023, based on the internal financial controls with reference to consolidated financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

"Company Overview

Integra Essentia Limited ("the Company") is a public limited company, incorporated and domiciled in India which mainly deals in trading of essential items like Cashew, Rice etc. The registered office of the Company is located at 902 9 th Floor, Aggarwal Cyber Plaza-1, Neta ji Subhash Place, New Delhi, North West, Delhi-110034. The Company is listed on the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE).

The standalone financial statements for the year ended 31st March, 2023 were approved by the Board of Directors and authorised for issue on 27th April 2023.

Note 1: Significant Accounting Policies

(a) Basis of Preparation of Financial Statements

(i) Statement of Compliance with Indian Accounting Standards (Ind AS)

These financial statements comply, in all material respects, with Ind AS notified under section 133 of the Companies Act, 2013 ("the Act"), Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other relevant provisions of the Act.

(ii) Historical Cost Convention

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities:

- a) Certain financial assets and liabilities that are measured at fair value
- b) Derivative financial instruments

(iii) Functional and Presentation Currency

These financial statements are presented in Indian Rupees, which is also the functional currency of the Company.

(iv) Current and Non-current Classification

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle (Twelve months) and other criteria set out in Schedule III to the Act.

(b) Property, Plant and Equipment (PPE) and Depreciation

All items of PPE are stated at cost less depreciation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition and initial estimate of costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are included in the carrying amount of PPE or recognised as a separate PPE, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Machinery spares and servicing equipment are recognised as PPE when they meet the definition of PPE. Otherwise, such items are classified as inventory.

Capital work-in-progress includes cost of PPE under installation / under development as at the Balance Sheet date.

The Company depreciates its PPE over the useful life in the manner prescribed under Part C of Schedule II to the Act. Depreciation commences when the assets are ready for their intended use and is computed on pro-rata basis from the date of installation/acquisition till the date of sale/disposal. Management believes that useful life of assets are same as those prescribed in Schedule II to the Act, except for machinery spares wherein based on technical evaluation, useful life has been estimated to be different from that prescribed in Schedule II of the Act

Assets	Useful Life
Plant & Machinery	5
Furniture and Fixtures	10 years
Office Equipments	3 years
Computer	3 years

Lease hold PPE are amortised over the period of lease or useful life, whichever is lower. Leasehold land (under Finance Lease) is amortised over the period of lease.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount.

These are included in the Statement of Profit and Loss.

(c) Intangible Assets and Amortisation

Intangible assets that are acquired by the Company, which have finite useful lives are measured at cost less amortisation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition.

Intangible assets are amortised on straight line basis over the estimated useful life.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount.

These are included in the Statement of Profit and Loss.

(d) Leases

At inception of a contract, company shall assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Where the Company is Lessee

At the Inception, lessee shall recognise and measure Right-of-use asset and lease liability at cost. Right to use assets shall comprise initial measurement of lease liability, any lease payments made at or before the commencement date, less any lease incentives received, any initial direct costs incurred by the lessee; and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Lease liability is the present value of the lease payments that are not paid. These lease payments shall be discounted using the interest rate implicit in the lease (if readily determined) otherwise should be discounted at lessee's incremental borrowing rate.

If the lease contract transfers ownership of the underlying asset, at the end of the lease term or if, the cost of the right-of-use asset reflects that the lessee will exercise a purchase option, then depreciate the right-of-use asset over the useful life of the underlying asset. Otherwise, depreciate the right-of-use asset till the end of the useful life of the right-of-use asset or the end of the lease term, whichever is earlier.

The lease term as the non-cancellable period of a lease, together with both: (a) periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and (b) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option.

Subsequently, lessee shall measure the right-of-use asset applying a cost model.

Where the Company is Lessor

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight line basis over the term of the relevant lease

(e) Borrowing Cost

Borrowing costs are interest and other costs that the Company incurs in connection with the borrowing of funds and is measured with reference to the effective interest rate applicable to the respective borrowing.

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use. Other borrowing costs are expensed in the period in which they are incurred.

(f) Financial instruments

(i) *Financial Assets*

Initial Recognition and Measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset."

"Subsequent Measurement

The Company classifies financial assets as subsequently measured at amortised cost, fair value through other comprehensive income (FVTOCI) or fair value through profit or loss (FVTPL) on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset, as per Ind AS 109.

a. Subsequent Measurement - Equity Instruments

All equity investments other than investments in subsidiaries, joint ventures and associates are measured at fair value. Equity investments which are held for trading are classified as FVTPL. For all other equity investments, the Company decides to classify the same either at FVTOCI or FVTPL. The Company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

Investment in equity instruments of subsidiaries, joint ventures and associates are measured at cost.

b. Subsequent Measurement - Debt Instruments

A financial asset being debt instrument that meets the following 2 conditions is measured at amortised cost (net off any write down for impairment) unless the asset is designated at fair value through profit or loss under the fair value option.

Business Model Test: the objective of the Company's model is to hold the financial asset to collect the contractual cash flows (rather than to sell the instrument prior to its contractual maturity to realise its fair value changes).

Cash Flow Characteristics Test: The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

A financial asset that meets the following 2 conditions is measured at fair value through other comprehensive

income unless the asset is designated at fair value through profit or loss under the fair value option.

Business Model Test: the financial asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling the financial assets.

Cash Flow Characteristics Test: The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

Even if an instrument meets the two requirements to be measured at amortised cost or fair value through other comprehensive income, a financial asset is measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an 'accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognising the gains or losses on them on different basis.

All other debt instruments are measured at fair value through profit or loss.

Derecognition of Financial Assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset, to another entity.

Impairment of Financial Assets

Loss allowance for expected credit losses is recognised for financial assets measured at amortised cost and FVTOCI.

For financial assets other than trade receivables, whose credit risk has not significantly increased since initial recognition, loss allowance equal to twelve months expected credit losses is recognised. Loss allowance equal to the lifetime expected credit losses is recognised if the credit risk on the financial instruments has significantly increased since initial recognition.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables, considering historical trend, industry practices and the business environment in which the Company operates or any other appropriate basis.

The impairment losses and reversals are recognised in Statement of Profit and Loss.

(ii) *Equity and Financial Liabilities*

Debt and equity instruments issued by an entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

a. Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

b. Financial Liabilities

Initial Recognition and Measurement

Financial liabilities are initially recognised at fair value plus any transaction costs that are attributable to the acquisition of the financial liabilities, except for the financial liabilities at FVTPL which are initially measured at fair value.

Subsequent Measurement

The financial liabilities are classified for subsequent measurement either at amortised cost or at fair value through Profit and Loss (FVTPL).

Amortised cost for financial liabilities represents amount at which financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount.

Derecognition of Financial Liabilities

A financial liability is removed from the Balance Sheet when the obligation is discharged, or is cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(g) **Fair Value Measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted prices in active markets for identical assets or liabilities
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 – Inputs for the asset or liability that are not based on observable market data.

(h) Inventories

Inventories are stated at the lower of cost and net realisable value. Costs comprise direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. The cost formula used for determination of cost is 'Weighted Average Cost'.

Machinery spares, stand-by equipment and servicing equipment are recognised as inventory when the useful life is less than one year and the same are charged to the Statement of Profit and Loss as and when issued for consumption.

(i) Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The Company's liability for current tax is calculated using the Indian tax rates and laws that have been enacted by the reporting date. The Company periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretations and provisions where appropriate.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax assets is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and current tax liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternate Tax (MAT) credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

(j) Provisions and Contingencies Provisions

A provision is recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent Liabilities and Contingent Assets

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases, where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements unless the probability of outflow of resources is remote.

Contingent assets are not recognised in the financial statements. If the inflow of economic benefits is probable, then it is disclosed in the financial statements.

Provisions, contingent liabilities, contingent assets and commitments are reviewed at each Balance Sheet date.

(k) Employee Benefits

(i) Short-term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Post-employment Obligations

The Company operates the following post-employment schemes:

- (a) Defined benefit plan (Gratuity), and
- (b) Defined contribution plans such as, provident fund.

Defined Benefit Plan

The liability or asset recognised in the Balance Sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually on the basis of actuarial valuation using the Projected Unit Credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The interest cost is calculated by applying the discount rate to the balance of the defined benefit obligation. This cost is included in employee benefits expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income.

Defined Contribution Plans

Defined Contribution Plans such as provident fund are charged to the Statement of Profit and Loss as an expense, when an employee renders the related services.

(iii) Other Long-term Employee Benefits

The liabilities for compensated absences that are not expected to be settled wholly within 12 months are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the Projected Unit Credit method. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in the Statement of Profit and Loss.

The obligations are presented as current liabilities in the Balance Sheet if the entity does not have any unconditional right to defer settlement for at least 12 months after the end of the reporting period, regardless of when the actual settlement is expected to occur.

(l) Cash and Cash Equivalents

For the purpose of presentation in the Statement of Cash Flows as well as the Balance Sheet, cash and cash equivalents include cash on hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(m) Earnings per Share (EPS)

Basic earnings per share are computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for the events for bonus issue, bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares).

Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income (net off any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares.

(n) Dividend Distribution to Equity Shareholders

Dividend distributed to Equity shareholders is recognised as distribution to owners of capital in the Statement of Changes in Equity, in the period in which it is paid. Dividend proposed by the Board of Directors, subject to the approval of shareholders, is disclosed in the notes to financial statements.

(o) Foreign Currency Transactions

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

(p) Revenue Recognition

Effective from 01 April 2018, the Company has adopted Indian Accounting Standard 115 (Ind AS 115)-

Revenue from contracts with customers'. Revenue from contracts with customers is recognized on transfer of control of promised goods or services to the customer at amount that reflects the consideration to which the company is expected to be entitled to in exchange for those goods or services. Revenue towards satisfaction of performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract. This variable consideration is estimated based on expected value of outflow. Revenue (net of variable consideration) is recognized only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Revenue from sale of products is recognized when the control on the goods have been transferred to the customer. The performance obligation in case of sale of products is satisfied at a point in time when material is shipped / delivered to the customer as may be specified in the contract.

Interest Income

Interest income is accrued on a time proportion basis, by reference to the principal outstanding and the applicable effective interest rate.

Dividend Income

Dividend income from investments is recognised when the shareholder's rights to receive payment have been established.

Income from Services

Income from services is recognised (net of taxes as applicable) as they are rendered, based on agreement/ arrangement with the concerned customers.

(q) Significant Accounting Estimates, Judgements and Assumptions:

The preparation of the Company's financial statements in conformity with Ind AS requires Management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances existing when the financial statements were prepared. The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognised in the year in which the estimates are revised and in any future year affected.

In the process of applying the Company's accounting policies, Management has made the following judgements which have significant effect on the amounts recognised in the financial statements:

- i. **Useful Lives of Property, Plant and Equipment:** Determination of the estimated useful life of tangible assets and the assessment as to which components of the cost may be capitalised. Useful life of tangible assets is based on the life specified in Schedule II of the Act and also as per Management estimate for certain category of assets. Assumption also needs to be made, when the Company assesses, whether as asset may be capitalised and which components of the cost of the assets may be capitalised.
- ii. **Fair Value Measurement of Financial Instruments:** When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs for these valuations are taken from observable sources where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of various inputs including liquidity risk, credit risk, volatility etc. Changes in assumptions/ judgements about these factors could affect the reported fair value of financial instruments
- iii. **Measurement of Defined Benefit Plan:** The cost of the defined benefit gratuity plan and other post-employment benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
- iv. **Impairment of Financial Assets:** Trade receivables are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when Management deems them not collectable. Impairment is made on the expected credit loss model, which is the present value of the cash shortfall over the expected life of the financial assets. The impairment provisions for financial assets are based on assumption about the risk of default and expected loss rates. Judgement in making these assumptions and selecting the inputs to the impairment calculation are based on past history, existing market condition as well as forward looking estimates at the end of each reporting period.
- v. **Impairment of Non-financial Assets:** The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered as impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

- vi. **Contingencies:** Management judgement is required for estimating the possible outflow of resources, if any, in respect of contingencies/ claim/ litigation against the Company as it is not possible to predict the outcome of pending matters with accuracy.

Total Financial Liabilities	5,423.87	5,423.87	4,480.72	4,480.72

B. Fair value measurements recognised in the statement of financial position:

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Particulars	As at March 31, 2023			As at March 31, 2022		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
At Amortised Cost						
Trade Receivables			1,034.79			790
Cash & Cash equivalents			556.42			44.07
Loans and Advances			8,264.29			0.35
Other Financial Asset			137.85			0.60
Subtotal	-	-	9,993.36	-	-	834.73
Financial Liabilities						
At Amortised Cost						
Borrowings			2,847.50			2,874.53
Trade Payables			2,408.26			1,442.61
Other Financial Liabilities			168.11			163.57
Subtotal	-	-	5,423.87	-	-	4,480.72

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values: Cash and cash equivalents, Trade receivables, Other current Financial assets, Trade payable and other current Financial liabilities approximate their carrying amounts largely due to the short-term maturities or nature of these instruments.

C. Fair values hierarchy

All assets and liabilities for which fair value is measured or disclosed in the Standalone Financial Statements are categorised within the fair value hierarchy, described as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Financial assets and liabilities measured at fair value - recurring fair value measurements

(Amount in Lakhs)

As at March 31, 2023	Level 1	Level 2	Level 3	Total
Assets at fair value				
Investments measured at fair value through other comprehensive Income				-
Investments measured at fair value through profit and loss				1,997.88
Total	1,997.88	-	-	1,997.88

As at March 31, 2022				Total
Assets at fair value				
Investments measured at fair value through other comprehensive Income				-
Investments measured at fair value through profit and loss				-
Total				-

There have been no transfers between levels during the period.

Valuation process and technique used to determine fair value

- The management assessed that fair value of cash and cash equivalents, trade receivables, trade payables, bank overdrafts and other current financial assets and liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.
- The fair values of the equity investment which are quoted, are derived from quoted market prices in active markets. The Investments measured at fair value and falling under fair value hierarchy Level 3 are valued on the basis of valuation reports provided by external valuers with the exception of certain investments, where cost has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represents the best estimate of fair values within that range.
- The fair value of non-current borrowings carrying floating-rate of interest is not impacted due to interest rate changes, and will not be significantly different from their carrying amounts as there is no significant change in the under-lying credit risk of the Company (since the date of inception of the loans).

D. Credit risk

The maximum exposure to credit risks is represented by the total carrying amount of these financial assets in the balance sheet

Particulars	Note No.	As at 31 March 2023	As at 31 March 2022
Trade receivables	6	1,034.79	789.70
Cash and cash equivalents	7 & 8	556.42	44.07
Investments	3& 5	1,997.88	0.00
Loans	9	8,264.29	0.35
Other financial assets (including investments)	4 & 10	137.85	0.60

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

Credit risk on cash and cash equivalents and bank deposits is generally limited as the Company transacts with Banks having a high credit ratings assigned by domestic credit rating agencies.
